
Minor Project #6

Project Title :

Network Project
Scanning &
Enumeration Report

Completed on

Jun 12, 2026

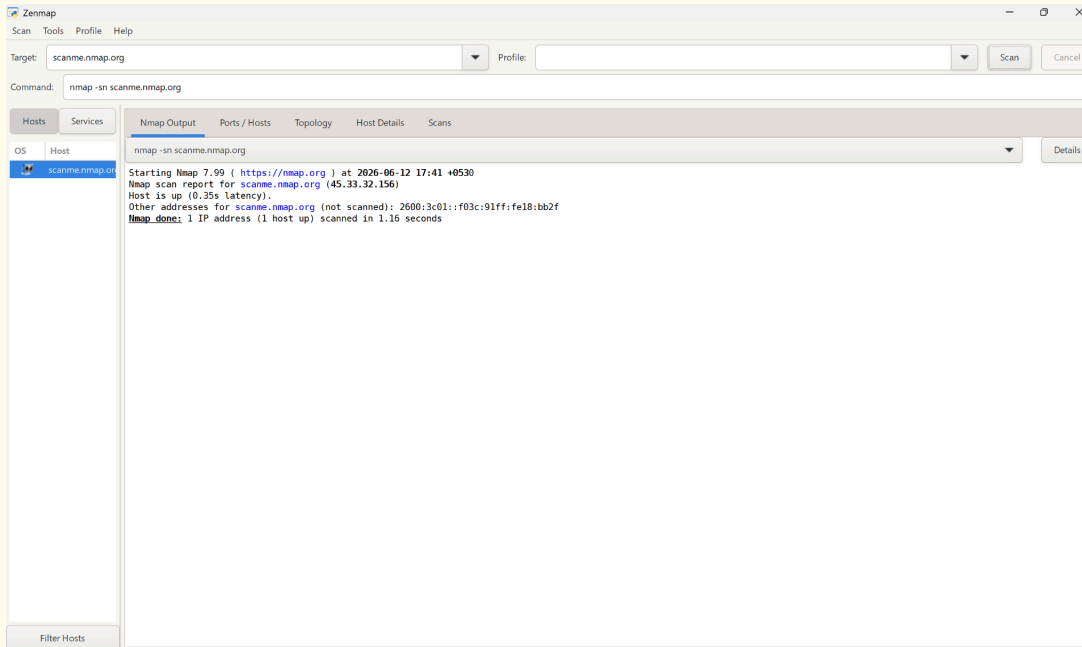

Prepared by

Vanchanagiri Siri V.

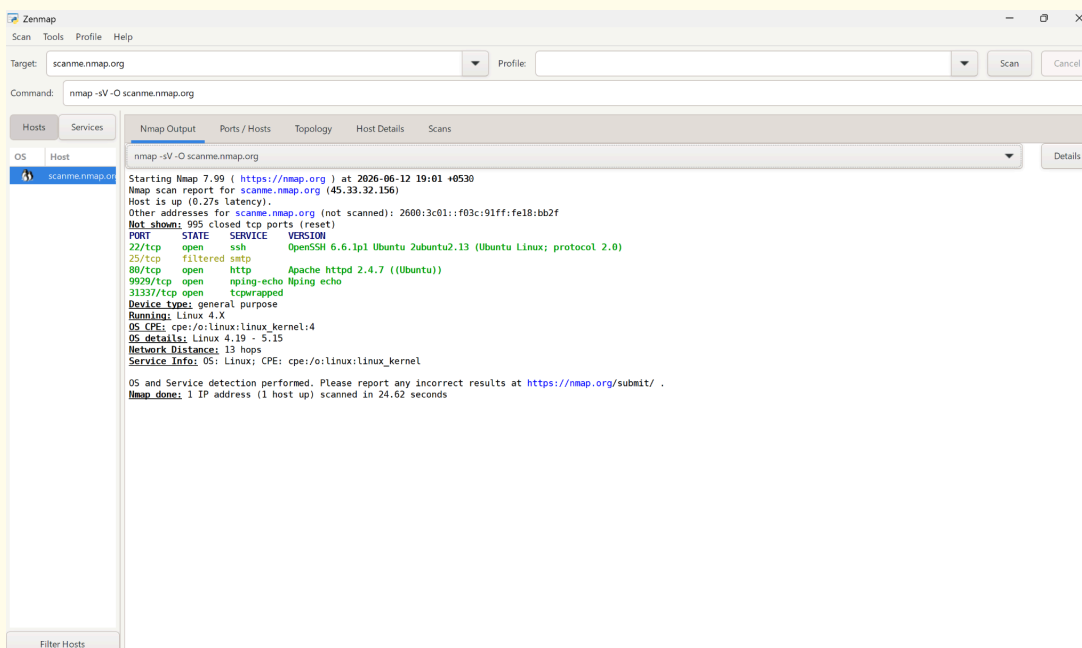

1. Target scanned :

scanme.nmap.org

Host Discovery

2. Port & Service Enumeration

Phase 3: Vulnerability Cross-Reference

- **Discovered Service:** Apache httpd 2.4.7
- **Known Vulnerability:** CVE-2014-0226
- **Risk Rating:** Medium / High
- **Description:** Cross-referencing against the public CVE database shows this older version of Apache contains a known flaw in its status module. An attacker can exploit this to cause a denial of service (crashing the server) or a buffer overflow.

Phase 4: Recommendations & Conclusion

- **Remediation:** Upgrade the Apache web server (Port 80) and OpenSSH (Port 22) to their latest stable patches to fix these known vulnerabilities.
- **Port Security:** Unused or non-essential ports should be blocked using a firewall.
